

# WHAT HAPPENS TO YOUR COVID-19 TEST AFTER YOU LEAVE THE TESTING SITE?

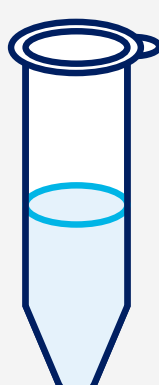

1

Your sample

2

Genetic material from your sample is combined with test reagents.

Testing machine

Results are either

-

or

+

Your sample will change colour if it has the virus in it (visible through a fluorescent reader in the testing machine).

3

Your results ( - or + ) are sent to you.

4

If your sample tests positive it may be selected for:

Variant of Concern (VOC) Screening

These variants can spread more easily and / or cause more severe disease than the originally described virus.

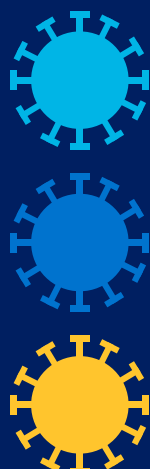

testing machine

Viral Genome Sequencing

sequencing machine

These measures help us identify viral genome mutations and track the spread of the virus.
